Program Description: During this eight week intermediate culinary training program, youth will build on the skills and foundation they obtained in the introductory PACTCooking project and take things to the next level but also back to the basics with a focus on professional knife skills and becoming more independent, creative and confident in the kitchen as a whole. Weekly classes will teach youth how to make more involved things such as fresh pasta and bread as well as learning about the importance of the Mother Sauces as the basis of so many dishes. Participants that complete this intermediate training will be ready for the advanced training program that fully prepares them for a job in a real kitchen, and should give them a better idea of whether this is a potential career path or just an important life skill and hobby they will take with them into the future.
